OBJECTIVE

Transitioning from Electrical Power Engineer to a versatile front-end developer, I bring a solid academic foundation from Faculty of Engineering. Mastering HTML, CSS, JavaScript, Bootstrap, jQuery, and React.js through self-directed learning highlights my commitment to staying current in web development. Actively engaging on LinkedIn and GitHub, I now seek a dynamic opportunity where my analytical mindset, adaptability, and the unique blend of engineering and programming skills can contribute to innovative projects.

EDUCATION

09/2015 – 07/2020
Cairo, Egypt

Bachelor's Degree, Faculty of Engineering, Cairo University 📄

EXPERIENCE

07/2023 – 11/2023
Cairo, Egypt

Part-Time Front End Developer, Theme Solutions

Redux toolkit

Hooks, State Management, Reusable Components, APIs, React Router...

CERTIFICATES

• Responsive Layout 📄

• Coding Exercises: ReactJS 📄

• Learning Git and GitHub 📄

PROJECTS

Click Market

This is an e-commerce Front-End Development project I am working on seeking to result in a visually appealing and responsive user interface, contributing to an enhanced online shopping experience. Demonstrates proficiency in React.js techniques and collaborative development practices, I have used "fake store API" to test my website.

Bda3ty Web App.

This is a CRUD web app for managing the storage internally where they can Create, Read, Update, Delete products easily depending on json server.

Tasking

This is a native web app using HTML, CSS, JavaScript to handle daily tasks depending on browser local storage.

I-store.

Design and develop a compelling landing page to promote and showcase the features of a product, with the primary goal of driving user engagement and conversions.
